

Inspired Practicality

Holmes Fire is a fire engineering firm dedicated to improving life safety and building design through performance-based fire engineering. Collectively we comprise one of the largest global networks of fire engineers, with offices in San Francisco and Los Angeles, New Zealand and Australia. We have a reputation for successful innovation: our designs adapt to the freedom of architectural expression while meeting prescriptive building codes.

Holmes Fire is a subsidiary of the **Holmes Group**: compelled by possibilities, we relentlessly contemplate Why to create what is Best. We ask great questions, do great thinking, and deliver beautiful design.

Holmes pushes boundaries. We put no limits on individual potential: we base rewards and advancement on achievements and entrepreneurship – not just seniority. At Holmes, we take an imaginative and resourceful approach to projects, challenging established conventions with cutting-edge technologies. If you are someone who pushes boundaries – in your achievements, interests, and abilities – then we want you as part of our energetic and collaborative team.

We are seeking fire engineers for our San Francisco and Los Angeles offices:

San Francisco - senior engineer with 8+ years of experience

Los Angeles - graduates with up to 5 years of experience

Job Requirements:

- M.S. degree in Fire Engineering and a PE license preferred
- Experience mentoring junior staff and providing technical leadership
- Enjoys working in a collaborative team environment
- Background in Code Consulting and Fire Protection Engineering Consulting
- Good understanding of performance-based fire engineering
- Experience working with authorities and design teams, interacting with clients

Send your resume with cover letter to bevan.jones@holmesfire.com.
