

NAVFAC (www.navfac.navy.mil) is the design and construction agent for all of Navy and Marine Corps shore facilities worldwide and provides design and construction support for the Air Force and other Federal Agencies.

NAVFAC is seeking entry-level Fire Protection Engineers for the following location:

NAVFAC Southeast (Jacksonville, FL)
NAVFAC Washington (Washington, DC)
NAVFAC Mid-Atlantic (Norfolk, VA)
NAVFAC Atlantic (Norfolk, VA)
NAVFAC Hawaii (Pearl Harbor, HI)

The work consists of projects involving widely diverse Department of Defense and Federal Government facilities. The projects involve fire protection and life safety elements of building design and construction for new construction, renovation, repair, alteration, and adaptive reuse of existing facilities.

The various NAVFAC offices have experienced FPEs and wish to add to their staff. The successful candidates will be mentored to develop, over time, an in-depth knowledge of the National Fire Codes, fire alarm and detection systems, water based fire suppression systems, relevant building codes, and criteria documents. The successful candidates will also learn project cost estimating skills and project management skills.

Competitive starting salary with a pay increase each year for the first three years, assuming successful performance evaluations. Excellent benefits and leave package.

Must be a U.S. Citizen
