Loss Control Consultant / Fire Protection Engineer

Job Type: Full Time / Travel Required
Salary: Starting at \$55,000 + Benefits

Location: East Coast
Closing Date: Open Until Filled

Career opportunity available at Fire Protection Solutions, Inc.

Fire Protection Solutions (FPS) is a property loss control and risk engineering firm based in Laguna Beach, CA. We are looking for a candidate based in the Midwest or eastern United States to conduct loss prevention surveys and produce high quality reports for industrial plants specializing in the pulp and paper industry. Job requires travelling, field work, and report writing. Assist client with fire protection system inspections and testing. Make any necessary recommendations for correcting and improving protection systems.

- Superior work environment with freedom of time management
- Excellent pay and benefits
- Flexible vacation schedule based upon contract performance criteria

Qualifications (Required Skills)

- Bachelors Degree in Engineering
- Working knowledge of NFPA and FM codes
- Strong computer skills

Desired Skills & Expertise

- Experience preferred
- Strong background in evaluating building construction, occupancies, and sprinkler systems
- Ability to report findings clearly and concisely using our proprietary database
- Good communication and writing skills
- Position requires field travel and report writing from your home
- Proficiency in CAD and other computer software typically associated with engineering
